## ABOUT ME

A Full-stack software engineer fluent in modern frameworks and cloud-native workflows. I have delivered scalable web and mobile based applications with technologies like Next.js, Express, React, React Native, Go, and Flutter. Committed to quality from developer experience to end user, I implement robust CI/CD pipelines and quickly adopted emerging technologies. This versatility lets me ship high-impact solutions for both teams and users.

## EDUCATION

**BSc (Hons) Computer Science - University of Westminster - 2018 to 2021**

*First honours*

## SKILLS SUMMARY

- **Languages:** JS, TS, Java, Go, Sass
- **Databases/OS:** PostgreSQL, MySQL,
- **Frameworks** NextJS, React, React Native, NestJs, Express, Angular, Flutter
- **Platforms/etc** AWS, GCP, Vercel, Cloudflare, Firebase

## WORK EXPERIENCE

**Senior Software Engineer - Enactor LTD ( 2021 - 2024)**

- Led the migration of in-house framework POS screens to a in-house React based POS.
- Refined and enhanced the initial version of the Self-Checkout React-based POS, optimising user experience and functionality.
- Managed and guided a team of two engineers in designing the MVP for a new POS launch tailored to US-based customers.
- Drafted and reviewing specifications for the team.

**Junior Engineer - Affno PVT LTD (2019 - 2020)**

- Developed chatbots for better leads and customer experience for users in multiple leading banks in the country using Google DialogFlow.
- Worked on a Ionic Application (Diary and File management solution) as the sole developer made for the Sri Lankan Attorney generals office.
- Worked on multiple frameworks and multiple projects from Laravel, Codeigniter

## PROJECTS

**Coinfella** | [Website](#)

- An invoicing platform that aims to bridge fiat users with defi based payments for freelancers
- Built entirely using NextJS, on the server less amplify platform
- Designed and built the entire architecture from scratch.
- Tech Stack - NextJS, PG, Nestjs

**Ride Services** | [Google Play](#) | [App Store](#)

- A ride-management platform that streamlines trip coordination between drivers and managers, complete with real-time driver location tracking for effortless oversight.
- Tech Stack - NextJS, PG, Flutter

**Taxi Platform**

- A multi tenant platform that allows users to manage organisations and users. The web app comes with a driver application to track trip time, breaks and manage other user related features.
- Tech stack - NextJs, NestJS, Flutter

**Eve** | [Google Play](#) | [App Store](#)

- Built an all-in-one mobile app for streamlined event management—users can create events, start group or one-to-one chats, share photos in a communal gallery, and run quick surveys.
- Tech stack - NestJS, Flutter

**Top on the Floor** | [Website](#) | [Google Play](#) | [App Store](#)

- a cross-platform web and mobile application that enhances engagement in the global street-dance community by publishing dancer rankings and achievements, while enabling users to discover and vote for emerging talent.
  - Updated payment processing flow and support for paypal, Updated global and category based ranking system
- Tech stack - ASP.NET Core, Flutter
